ABOUT OUR AACE PERU 2023 ANNUAL CONFERENCE

Since 2013, the AACE Peru Section has been strengthening its presence in the country, focused on disseminating the best practices of AACE International through its Technical Talks and annual International conferences, where professionals with broad international experience participate in issues associated with the disciplines that the AACE leads (Claim Management, Forensic Analysis, Schedule, Estimates, and Risks Management, among many others). The Peru section organizes on this occasion the "11° International AACE Annual Conference - Driving the power of change with AI, Decarbonization and Project Management", an event of wide visibility in the sectors of Mining, Energy, Oil, Infrastructure, Buildings, Engineering, and Construction mainly.

In 2022, AI is successfully connecting with asking and discussion **applications**, which provide quality answers and arousing interest because of its impact on management, even for users without technological knowledge.

In 2023, "El Fenómeno del Niño" drives the decarbonization in the asset lifecycle, raising questions about new **roles** and the use of decarbonization S-curve.

HOW TO IMPLEMENT THESE NEW APPLICATIONS AND NEW ROLES?

At the 11° AACE Peru 2023 Annual Conference, experts in Management and Project Control will share the knowledge to facilitate the implementation of these innovations.

Sincerely,
Board of Directors
