# ABOUT AACE PERU

Since 2013, the AACE International Section Peru comes consolidating its presence in the country through the dissemination of its best practices recommended during your technical talks bimonthly and international congresses, where they participate professionals with extensive international experience in associated with the disciplines that the AACE leads (Claims Management, Forensic Analysis, Schedule Management, Budget and Risks, among many others). The Peru Section organizes in this opportunity the "10th AACE International Congress on Cost Engineering", an event with wide visibility in the sustainable sectors of Mining, Energy, Oil, Infrastructure, Buildings, Engineering and Construction mainly.

"In an increasingly uncertain global context, where the response of markets, the environment and the population have a substantial impact on the development of projects, governments and private organizations seek to transform the way they their projects, integrating sustainability concepts in all areas, for which it is essential to share a long-term vision with all those involved, a long-term vision of the project and its positive impact on the environment.

The 10th AACE Peru 2022 Congress will seek to share the experience of renowned professionals and the best practices that have been applied internationally from this perspective.

The agenda of the event has been structured into 09 thematic blocks, in which we will have the participation of specialists in their respective fields, with high international prestige."

**Cesar Ramos Salazar, CEP, CCP.**  
PROJECT MANAGER

# WELCOME

We welcome you to this new virtual congress, with which we seek to spread knowledge to our AACE community both inside and outside of Peru.

Carrying out our congress virtually, through a platform like Whova, ensures its participants:

Interaction with speakers and sponsors

Bilingual Congress. Presentations 100% in Spanish and English.

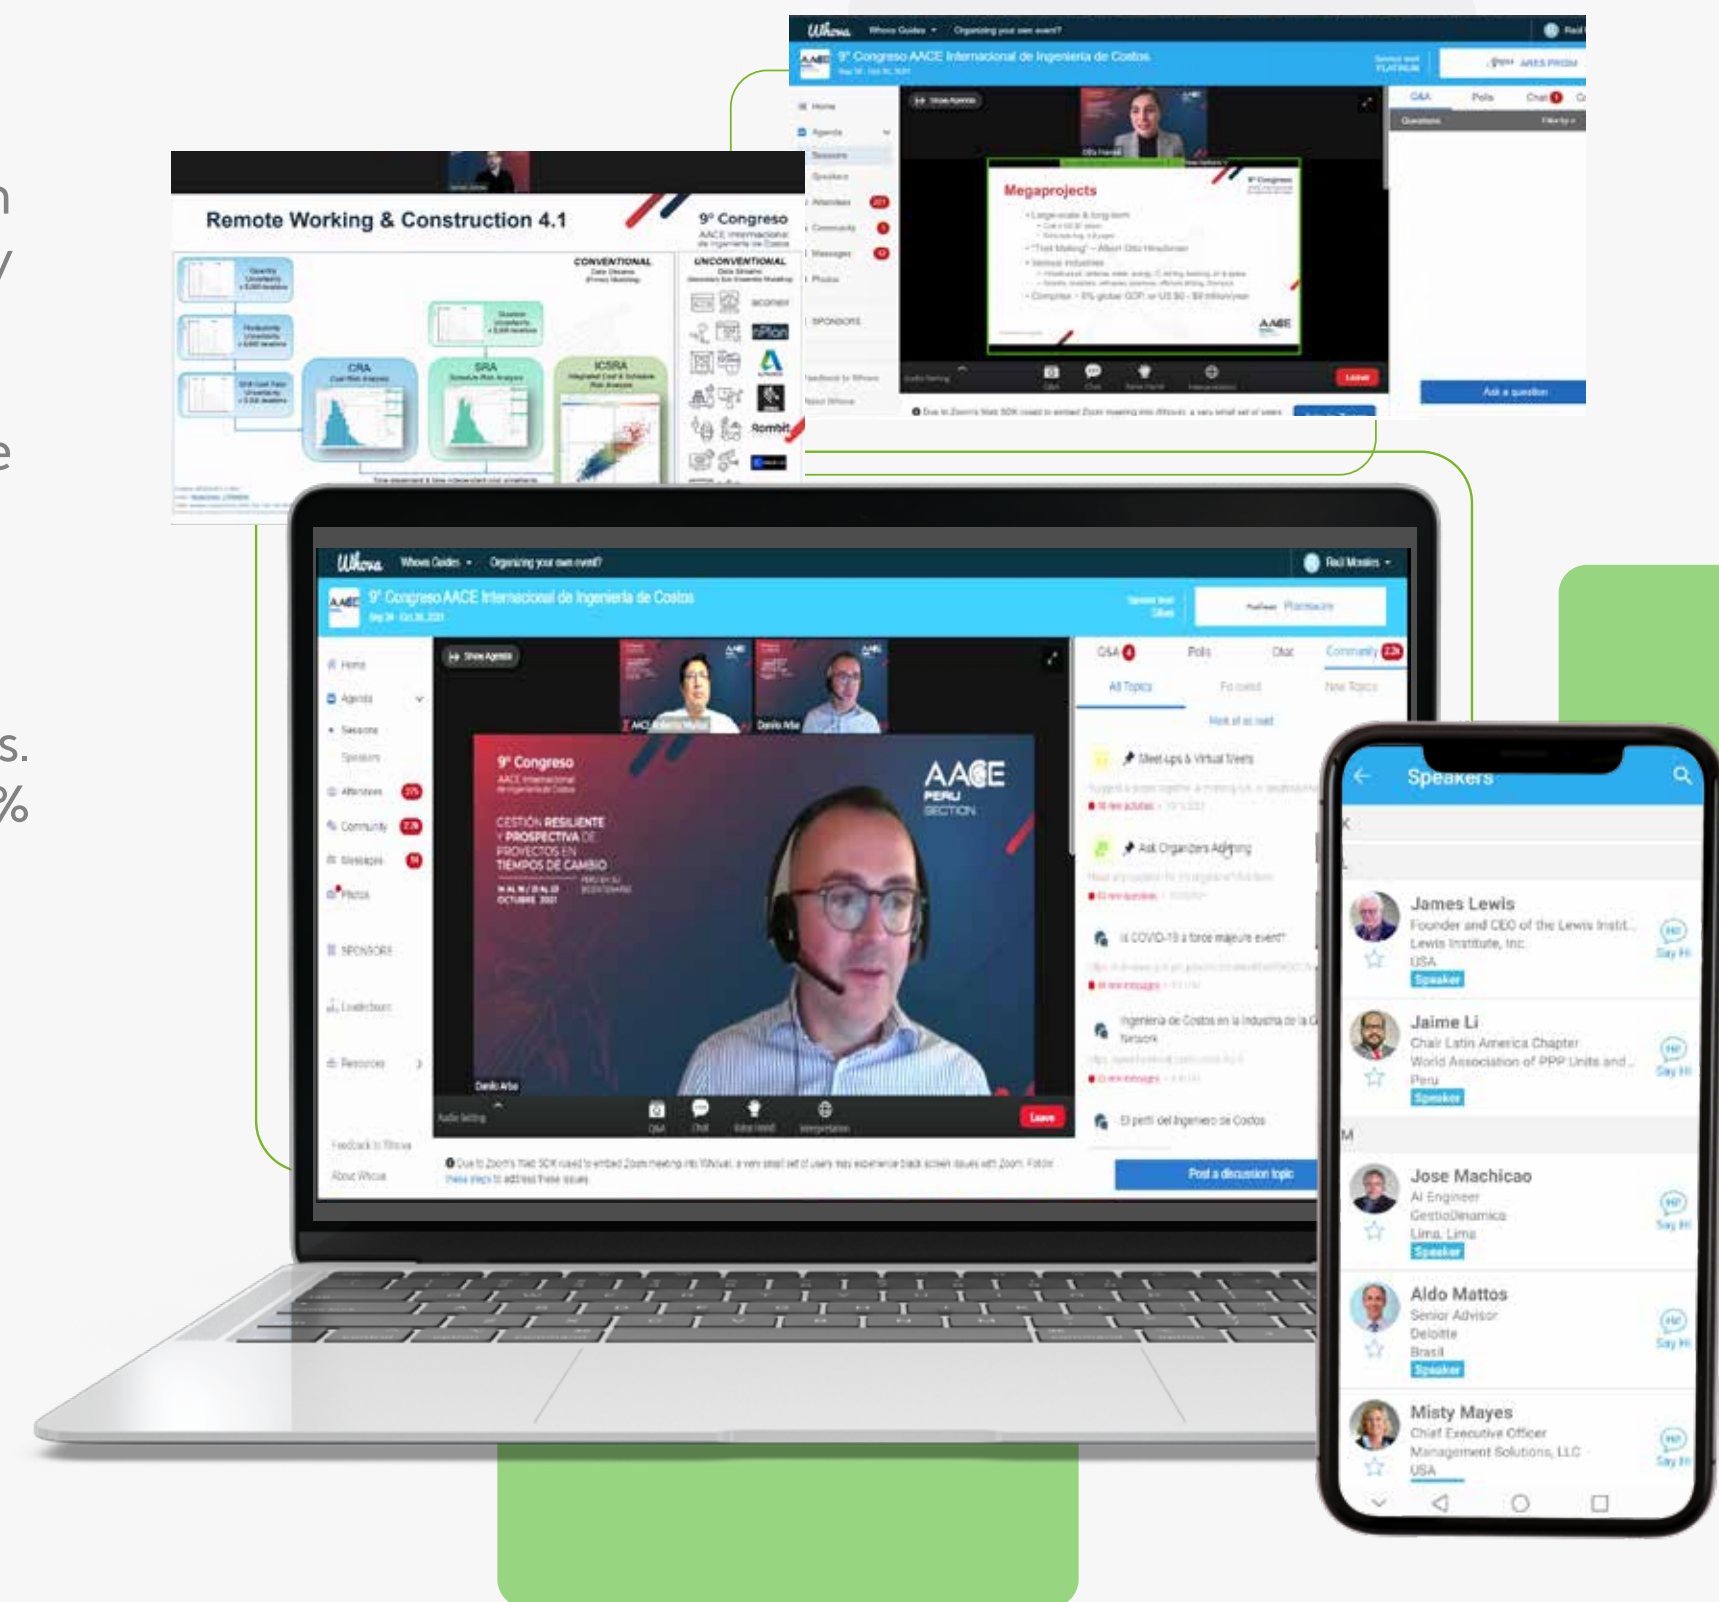

Networking

Forums of discussion

Access to lectures and workshops for a 09 months.

# AGENDA
